The Cooper Advantage

Not all electrical companies are created equal.

COME SEE WHAT SETS US APART

We have high standards of integrity, professionalism and quality workmanship from our employees, vendors and partners. These core values propel us to make a difference in our community and in the lives of our team members, and seek to inspire higher standards in our market.

Our Core Values

We like to keep things simple.

We don't overcomplicate our values with long mission statements or buzzwords. Our approach is straightforward and proven. At the core of everything we do are three words >>>

INTEGRITY
PROFESSIONALISM
QUALITY

Our Core Values

01

Integrity

We do what we say we're going to do — even when it's inconvenient. That means honest pricing, realistic schedules, clear communication, and standing behind our work. If there's an issue, we address it directly instead of making excuses or passing blame.

02

Professionalism

We show up prepared, respectful, and accountable. Our team communicates clearly, treats jobsites with respect, works well with other trades, and represents our clients and our company well. Professionalism is how we protect relationships and reputations.

03

Quality Workmanship

We take pride in doing the job right the first time. Our work is clean, code-compliant, and thoughtfully installed — not rushed or sloppy. Quality workmanship means fewer callbacks, smoother inspections, and electrical systems built to last.

04

Humility

We stay teachable. We value the perspective and experiences of every team member and customer. Humility keeps us improving our systems, our skills, and how we serve our clients — instead of assuming we already have it all figured out.

Do These Values Sound Like Your Own?

We want to partner with YOU!

We believe great projects are the result of strong partnerships. We intentionally align ourselves with residential and commercial contractors who run their business with integrity, clarity and purpose.

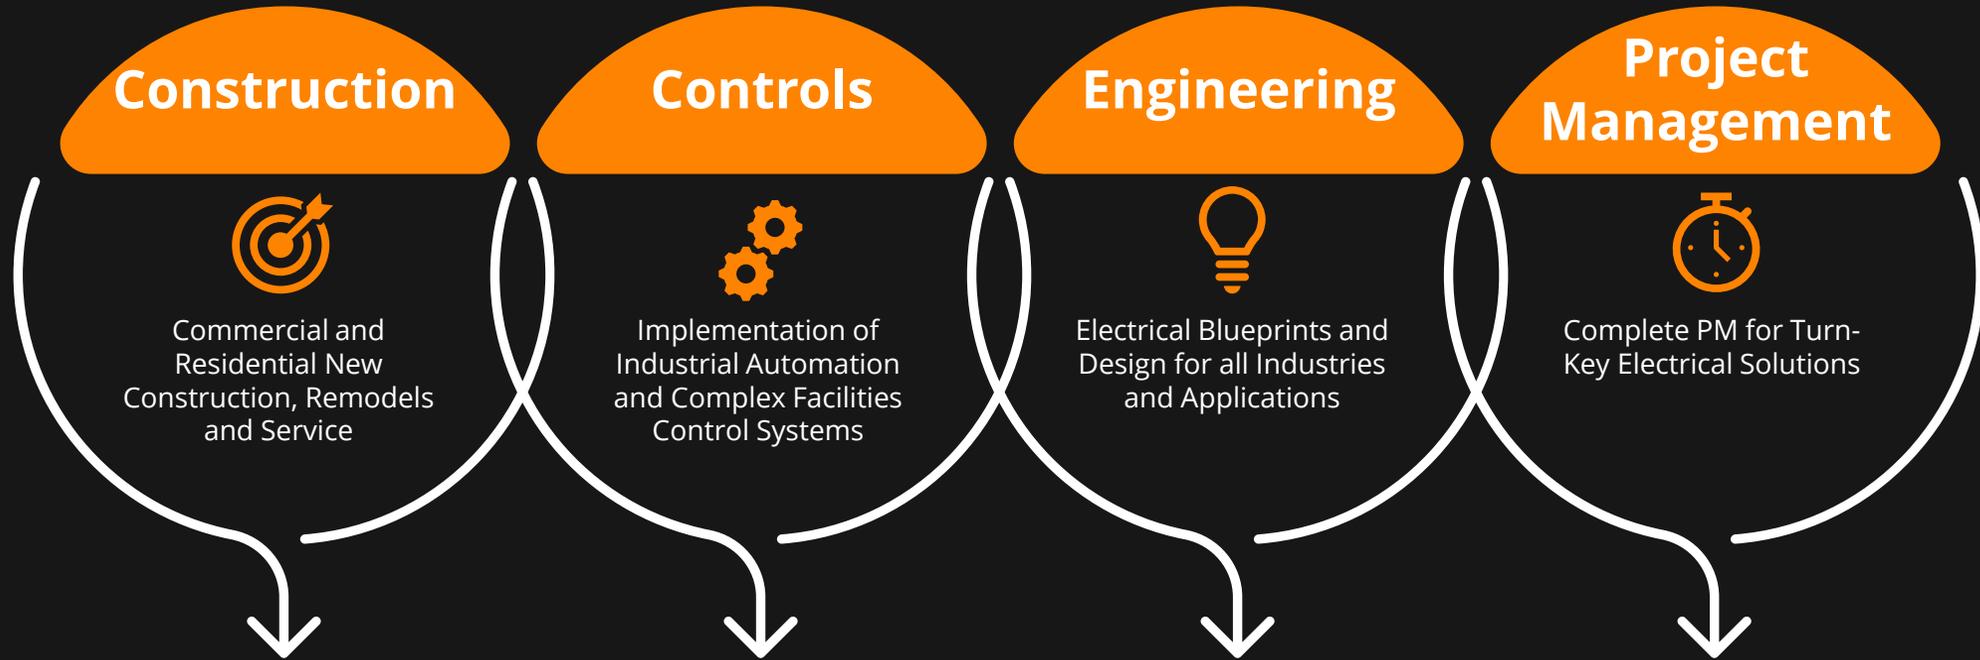

A Mutual Fit Matters

We are thoughtful about the projects and partners we take on. Our processes are designed for contractors who value planning over chaos, execution over excuses, and long-term relationships over short-term gains.

If you run organized projects, respect your trade partners, and believe that strong systems produce better outcomes, we will be a GREAT fit!

Your One Stop Shop for All Things Electrical

In every construction industry - No project is too big or too small!

Advanced in-house expertise for all things electrical controls

We can design it...
We build it!

On The Cutting Edge of Project Management Technology

AI-driven tools to streamline operations

We rely on structured project management tools at every level of our company, from apprentices in the field to upper management. Clear scopes, organized schedules, material tracking, and documented communication keep everyone aligned and accountable. We also thoughtfully incorporate modern tools—including AI—to improve planning efficiency, streamline documentation, find helpful knowledge to solve complex problems. This disciplined, tech-enabled approach allows our team to work efficiently, reduce mistakes, and adapt quickly when conditions change—resulting in smoother projects, fewer surprises, and consistent results for our clients.

Our Family is our “Why”.

Our families set the standard for how we work. They deserve our responsibility, accountability, and pride in our craft. We carry those values onto every jobsite, treating each project with the same care we would want in our own homes.

From our family to yours, **THANK YOU** for trusting us with your projects!

Team Christmas Party - 2025

Community

Deep roots. Lasting relationships.

We believe being a great electrical company also means being a great neighbor. Our work is rooted in the communities we serve, and we take pride in showing up—whether that’s supporting local businesses, helping neighbors restore power quickly during urgent situations, or contributing our time and expertise where it makes a real difference. We value relationships over transactions and approach every project with humility, gratitude, and a genuine desire to leave things better than we found them. By investing in our community and the people in it, we’re not just building electrical systems—we’re helping build a stronger, more connected place to live and work.

Memberships:

Blount Partnership

Connecting with institutions, government and small businesses in the heart of East TN.

**Project Management
Institute (PMI)**

Connecting with like minded professionals to remain on the cutting edge of project management best practices.

Unmatched value for your investment

Providing high-quality work and excellent service at a fair and competitive price, no matter how big or small the project.

A message from our owner:

You've made it this far! For that, THANK YOU for taking the time to learn more about Cooper Electrical Systems.

Our company was built with a simple goal: to do electrical work the right way, for the right reasons, with the RIGHT PEOPLE. I am so proud of each and every member of our team and believe we have built a truly special culture that can outperform any of our competitors.

We don't chase volume or shortcuts. We intentionally partner with builders and homeowners who share our values and want to build a long-term partnership with consistent results. From our apprentices in the field to our leadership team, we take pride in being organized, prepared, and dependable—because that's what we expect from the companies we trust ourselves.

So here's our invitation to you: If you choose to work with us, you can expect a team that takes your project seriously, respects your schedule, and stands behind its work. We'd welcome the opportunity to earn your trust and build something solid together.

— Matt Cooper
